

Putting together a Brindille & Twig pattern:

- Print the pattern pages at 100%- No scaling or fitting to page.
- (I suggest only printing the pattern and reading instructions off the computer, if you have Internet access.)
- Follow the photo examples to tape your pattern together.

Pattern printed out.

Measure the 1"x1" square to make sure it printed accurately.

Cut along the edges of the indication boxes to cut the extra white paper off. It makes it easier to line them up.

Overlap those boxes with the matching number and tape together at that seam.

Cut out the size that works best based on the measurement chart.

Common instructions:

Cut on fold: Place the labeled 'fold line' along the folded edge of the fabric. Cut out the pattern piece through both layers of fabric and open to get a full piece

Notch: Needs to be clipped when cutting the pieces out. It will be indicated by a small line at the place that it needs to be marked. Example: center of a pants waist or center neck of a front piece. Mostly used when a piece is cut on the fold. Although, may be used at other times as well. You will make a 1/8" (2mm) cut into the fabric at that point. It will be used to match pieces later.

Cut opposites: For some pieces, a right and a left side need to be cut. Example: Hoods, some pants and some sleeves.

To get the opposite pieces, cut 1 with the pattern facing up like the first photo and 1 with the pattern facing down like the second photo. You can also cut once on a piece of fabric that's been folded over to get 2 layers.

Grainline: Grainline is very important because it affects the way your fabric stretches.

If the grainline is vertical, the stretch is horizontal.

In most cases the stretch should be horizontal 'going around the body' so the grainline should be vertical.

If the grainline isn't easily visible you can see it better when you stretch the fabric .

The selvage edge will usually be kind of stiff with some holes in it from the manufacturing process.

The grainline runs parallel to the selvage edge.

Right sides together: Meaning, the right sides of the fabric will be laying together. This is the way most seams are sewn so the seam is on the wrong side of the fabric. Assume that the fabrics will always be right-side-together unless otherwise specified.
